A DERMATOLOGY SURGICAL AND MEDICAL GROUP

To Our Patients

Southern California Dermatology Dermatologists and Dermatology Physician Assistants are now offering Telemedicine visits to patients who choose to remain at home during this public health emergency. Telemedicine allows our providers to do a video conference visit with patients at home reducing unnecessary exposure to patients, providers and staff. Although this method is not appropriate for all patient care, it is suitable for many situations. If determined necessary by you and your provider of care, an in-office visit can also be arranged. We continue to remain open for any in-office visits as well.

We are aware of the challenges everyone is facing due to the COVID-19 outbreak. Our plan is to keep our office open to provide medical care to our valued patients. We will continue to follow the precautions and advice from the CDC, Health Department and local infectious disease specialists to help keep our patients and staff safe.

We remain committed to delivering exceptional care while doing our part to reduce the spread of the Coronavirus, including careful monitoring of the health and well-being of our staff. Over the past month we have taken a series of precautionary steps at our location, including increased cleaning and disinfection of our entire office, and we are screening all patients for symptoms of the virus.

The safety of our patients and staff is our top priority. We appreciate the trust our patients have in us and look forward to being of service to you.
